

Environmental Management Policy

Environmental Management Goals

Hanssem Co., Ltd. recognizes the environment as a key stakeholder and pursues environmental management for sustainable products, spaces, and the planet to realize social value.

1. Establishing an Environmental Management System

- ISO 14001 Certification
- Joining International Initiatives [CDP/UNGC]
- Compliance with Environmental Laws and Regulations

2. Addressing Climate Change

- Establishing a Carbon Neutrality Roadmap and Implementation Strategy
- Enhance energy efficiency at business sites
- Expand greenhouse gas management scope to cover the entire lifecycle

3. Environmentally Friendly Research and Development

- Expand eco-certified products
- Chemical substance management
- Development of recycled products/green packaging

Environmental Management Policy

Hanssem Co., Ltd. values the environment through sustainable environmental management, focusing on minimizing pollutant emissions and improving the local environment to fulfill its social responsibility.

First, Hanssem places the environment at the core of its management strategy and pursues a sustainable vision for future generations.

1. We fulfill our environmental responsibilities by establishing a rigorous environmental management system based on ISO 14001.
2. All employees enhance their capabilities in environmental management to jointly fulfill the company's social responsibilities.
3. We actively participate in minimizing pollutant emissions and improving the local environment to realize sustainable management.
4. We strictly comply with all environmental laws and regulations and proactively respond to new environmental regulations to minimize environmental impact.
